Story Problem Anticipatory Framework and Observation Sheet

Story Problem: Problem Type: Number Sentence: Comprehension Question: CQ Explemary Response: CQ Low Quality Response: Which students used which strategies to solve? Direct Modeling (Students actually using manipulatives to help to show how they solve their problem.) Counting Strategies (Students actually using hands, tally marks, or other strategies to count. Are they counting on from the first or from the largest?)
Number Sentence: Comprehension Question: CQ Explemary Response: CQ Low Quality Response: Which students used which strategies to solve? Direct Modeling (Students actually using manipulatives to help to show how they solve their problem.) Counting Strategies (Students actually using hands, tally marks, or other strategies to count.
